*Reasons for Allowance*

Claims 31-46 are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art uncovered during examination discloses the following elements:

US Patent No. 6,913,599 issued to Mishima: teaches an elastic inner layer that is elastic in the lateral and longitudinal directions and defining an opening in the crotch region and an absorbent assembly comprising a topsheet layer and core layer. Mishima does not teach an elastic inner layer including a front piece, a back piece and a crotch piece and does not teach an absorbent assembly comprising a barrier layer.

US Patent No. 4,990,147 issued to Freeland: teaches an elastic inner layer including a front piece and a back piece attached to a crotch piece and the front and back pieces are elastic in a longitudinal direction the crotch panel can be inelastic in a longitudinal direction. Freeland teaches the crotch piece defines an opening in the crotch region. Freeland does not teach the back piece elastic in only the lateral direction and crotch piece elastic in the longitudinal direction and does not teach a barrier layer for an absorbent assembly.

US Patent No. 6,547,774 issued to Ono: teaches an inner layer including a front, back and crotch pieces and an absorbent assembly including a topsheet layer, a core layer and a barrier layer. Ono does not teach an elastic inner layer or an opening in the crotch piece.

While the prior art of record discloses various elements of inner layer pieces having lateral and longitudinal elasticity and openings, none disclose or fairly suggest a back piece elastic in a lateral direction and crotch piece elastic in the longitudinal direction in combination with the crotch piece defining an opening and an absorbent assembly comprising a barrier layer.

These features render the claimed invention non-obvious over the prior art of record. Claims 32-46 are allowable as being dependent from independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
